Damon ,

As discussed, all of the EDDs that have been generated so far for the project are available for download on the CFAC database website.

The geologic logs/well construction logs and field datasheets will be included as appendices to the draft Phase I Site Characterization Data Summary Report, which we plan to submit at the end of the month.

I will provide final sample counts next week once we have had a chance to perform final QA/QC on all the numbers.

Thanks.
